

# Financial-Economic Verification

**BOCS Foundation**  
**For the 2015-2016 CO<sub>2</sub>e-emission prevention report**

**Date: 14th November 2017**

**László Károly**

**Mechanical engineer, Economist,  
MBA, iCC expert**

**Referring to the BOCS Foundation's 2015-2015 CO<sub>2</sub>e-emission prevention report, its appendices and annexes, the calculations based on them, and the result of**

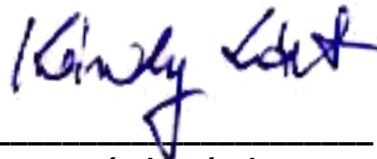

2015: 11 745 tCO<sub>2</sub>e

2016: 5668 tCO<sub>2</sub>e

**totaling: 17 413 tCO<sub>2</sub>e emission prevention figure is the consequence of the expenses of the BOCS Foundation's projects stated in the annexes, which are also published in the financial reports. I have checked the related calculations, and they are well-founded and correct.**

**The sums of these expenses have reached their environmental goals the way it was described in the report, and are suitable for the VCUs (Voluntary Carbon Units) to be listed at the registrar in order to create QFPC™**

**with respect to a total of 17 413 pcs (VCU).**
